Largest Manufacturer of

Life Motion
Films, Slides

Picture Machines
and Stereopticons

LUBIN BUILDING, 926-928 MARKET STREET

PHILADELPHIA,
PENNA., U. S. A.

1. We sell for cash only.
2. Goods are not sold on time.
3. In ordering the best way is to send Postoffice or Express Money Order for the full amount. You also may send Bank Draft which can be obtained at any Bank.
4. Goods can be shipped either by Express or Freight, but where machines are wanted in limited time we would advise that shipments go by Express as it is the best mode of transportation and if sent by freight the time lost in transit would cause a much greater loss than the additional cost of the express over the freight rate.
5. If you do not care to send us the full amount with your order, you can deposit the money with your express agent and have him write or telegraph us to that effect, and we will ship your order the same as we would if the full amount was in our hands.
6. We forward goods C. O. D. only upon receipt of one-half the amount of the original order as guarantee of good faith. Customers can save return charges on C. O. D. shipments by sending full remittance with their orders.
7. If desired, we ship goods with the Privilege of Examination in the Express Office.
8. Goods to be sent by mail will be forwarded only when accompanied by cash in full.
9. If immediate shipment is required do not send Personal Checks, but Money Order or Draft only.
10. Be careful to give full address and to state line or Express Company by which shipment should be made.
11. If further information is desired we will be pleased to write in greater detail upon request, therefore do not hesitate in making your wants known to us.
12. We manufacture not only the world renowned Cineograph with Stereopticon Combined but also Films, Stereopticon Slides, in short, everything pertaining to the Life Motion Picture Business.

FOREIGN SHIPMENTS

1. It is necessary that the full amount accompany all orders from Foreign Countries, or the order can be placed through any of the responsible New York Export Houses to whom you can send the money, with instructions to pass same to us on receipt of bill or shipping documents.
2. Orders can be forwarded by cablegram and the money sent at the same time by mail, and by the time the funds reach us the goods will be ready for immediate shipment.

GUARANTEE AND WARRANTY

1. We guarantee every Machine of our manufacture and while our line embraces a great number of various styles and prices, we make but one grade, that is, the best.
2. Each and every Machine that leaves our factory bears the stamp of Durability and perfect Mechanism. It matters not whether it is our lowest or highest priced machine, you are sure of getting your full money's worth. Every Machine is guaranteed to give perfect Satisfaction and every part is warranted to be made of the very best Materials.

UNDERWRITERS' APPROVED MODEL

Underwriter's Approved Model

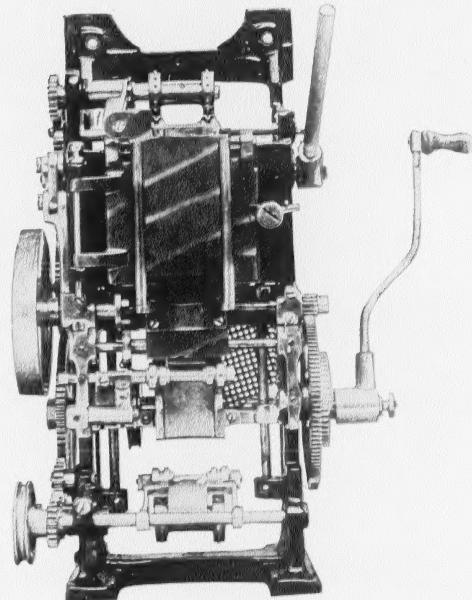

"MARVEL"

The Outfit is built to stand the wear of hard work. No complicated machinery, liable to break down when you need it most. The superiority of our machine over all others lies in

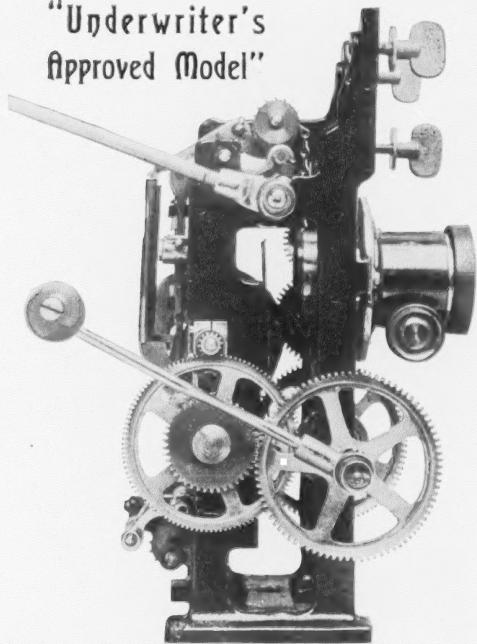

Workmanship, Simplicity, Completeness, Durability

UNDERWRITER'S APPROVED MODEL

This picture of the 1908 Marvel shows HOW EASILY REPAIRS CAN BE MADE if necessary. EVERY PART IS INTERCHANGEABLE AND quickly replaced. The frame is OPEN ALL AROUND so that NO DUST can settle in the Mechanism. The gears are divided, working on both sides of the frame, which guarantees a steady and even motion.

Another view of the "Marvel"
"Underwriter's
Approved Model"

The gearings of
"UNDERWRITER'S APPROVED MODEL"

are made of Phosphor Bronze, minutely exact, highly polished by the
most skilled labor, thus MAKING THE MACHINE ABSO-
LUTELY FLICKERLESS.

16

Moving Picture Projecting Lenses

All our Machines are equipped with Moving Picture Lenses made by the Bausch & Lomb Opt. Co. of Rochester, N. Y., stamped with their address and specially made for us.

It is well known that the Bausch & Lomb Opt. Co. are the largest Lens Manufacturers in the world. Their Lenses are guaranteed to give best results.

The Middle Distance Lens will project a picture approximately 12 x 14 at 50 feet distance.

The Long Distance Lens will give about half the size picture at the same distance while the Wide Angle Lens will give half a size larger picture at the same distance. At a longer range or shorter range pictures are larger or smaller, according to the lens and distance.

Fig. 3.

Fig. 2.

Film Repairer, Made of Solid Brass, Nickled.
Price, \$1.00.

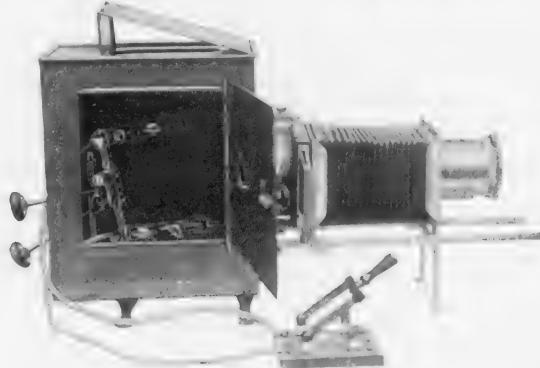

Film Cement.
Price, 15c per Bottle
By Mail, 25c.
Including postage.

DIRECTIONS.

Cut the Film about $\frac{1}{4}$ inch from LOWEST line of one of the pictures, see Fig. 1. Cut a $\frac{1}{4}$ inch from the extreme TOP line of the picture. The $\frac{1}{4}$ inch on the end is necessary to join the Film. Moisten with the tongue the end on which the $\frac{1}{4}$ inch has been left, and scrape off the Emulsion on to the line of the adjoining picture, with a pocket knife, see Fig. 1. The white line which should be about $\frac{1}{4}$ inch long and is part of another picture, shows where the emulsion has been scraped off. This is where the Cement should be placed. Be sure to have the Film clean before applying Cement on the Film. The dark side of the Film is the Emulsion side. Lay Fig. 1 on back of the Film Mender, Fig. 3, and apply the Cement. Then lay Fig. 2 on the side of the Mender, and press the finger tightly through the centre directly over the Cement. Wait a moment, and the Cement will dry in a few seconds. If properly cemented, the joint will be equally as strong as before the Film was cut.

23

LUBIN'S "Grand Stereopticon"

The cheapest and best Stereopticon on the market for Views, Illustrated Songs, Poses and Serpentine Dances. Can also be used as a small Spotlight by disconnecting Bellows and lens and taking out the front Condenser. A perfect machine at a small price. Special Combination Objective lens sixteen-inch bellows with lens to suit any distance and size of screen. Including Electric lamp, and Adjustable Rheostat, also Calcium lamp.

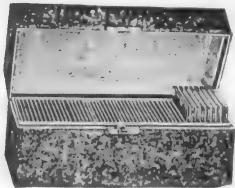

Price, \$35.00

The same with Calcium lamp only

Price, \$25.00

FOR USE WITH OUR

OXYLITHE GAS-MAKING OUTFIT

THE LATEST product in this line, and possess
a special merit that are appreciated by the
men trade.
and Compact
Will Not Crumble
It Gives a uniform Supply of Oxygen
The Gas is 98 to 100 per cent., pro-
duced by the manufacturers to produce 150
cubic feet, which is equal to that of any other
gas box, which is adapted for use in the
Oxygen Outfit, and all users of this outfit
will find it a great convenience.

DER THE ADVANTAGE of being able to produce from practically pure gases. Compressed gas contains about 15 per cent of impurities which are removable and reduce the intensity of the illumination, hence a great advantage to be gained by the Enterprise Outfit, to say nothing of its convenience.

if you have a gas making outfit, send a trial order.

um for the production of Oxygen Gas, packed
in but if you haven't the gas outfit, order both.

3

THE BEST SUBSTITUTE FOR ELECTRIC LIGHT

“OXYLITHE”

Gas Making Outfit

Makes Its Own Gas, but Requires no Forced Pressure, No Hot Retort, No Furnace, No Hot Water, No Heat of Any Kind, No Gases in Wrong Place, Causes No Disappointments, No Failures, No Delays, No Accidents, No Freight, Express, Cartage, No Excess Baggage Bills, No Disappointments Owing to Delays in Transit, or Illuminating Apparatus Going Astray as when Using Cylinders or Old Style Outfits.

A CHILD CAN USE IT WITH PERFECT
SAFETY, AND ITS WEIGHT IS
BUT 35 POUNDS
(Including the Case)

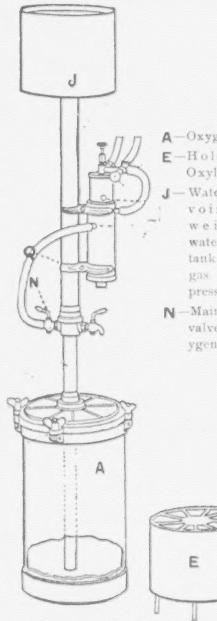

It Makes PURE Oxygen Gas (Others only 85 Per Cent.). It is Positive. It is Automatic. It Makes Gas as Used. No Waste of Chemicals, as it May be Charged for any Length of Entertainment Desired. Gives Over 200 Candle Power Light.

Gives Over 700 Candle Power Light, as strong as from Compressed Gases in Cylinders, and Stronger than Produced by Other Portable Gas Making Outfits.

Calcium Light is produced by burning in combination, the proper proportion of Oxygen and Hydrogen gases, both of which are generated in the "Oxylite" outfit. The Oxygen Gas is generated from either one of the New Oxygen Chemical Compounds which are put up in sealed tin boxes, weighing about 2½ pounds. These chemicals generate Oxygen Gas when brought into contact with water with which the tanks are partly filled. The Hydrogen Gas is produced by the vaporizing of Sulphuric Ether. Calcium Light, (sometimes called Ox-Y-Hydrogen) is the only all-around satisfactory light for high-class Stereopticon and Motion Picture exhibitions, and no traveling exhibitor who desires to give a first-class show to large audiences, at good prices, can afford to be without it.

The Oxylithe Calcium-Gas-Light Outfit,
complete including rubber tubing, wrench, tongs, funnel and full printed instructions, in case, . . . **\$37.50**

13

- A**—Oxygen Tank.
- E**—Holder for Oxytite.
- J**—Water reservoir. The weight of water in this tank gives the gas sufficient pressure.
- N**—Main cock or valve for oxygen gas.
